Version 20240315 - 15-MAR-2024	

Overview

Viewsonic provides a universal API for their range of projectors for RS232 based controls.

The Chowmain Viewsonic universal projector driver for Control4 provides seamless integration of all Viewsonic projectors via this API and allows you to control all the standard features you would expect with a projector and more.

Features

- Bi-directional RS232 control and feedback
- Power management
- Audio Controls (Volume Up, Volume Down and Mute)
- Navigation / Transport controls for Menu and Smart System interfaces
- Lamp hour feedback
- Source Selection
 - HDMI 1
 - HDMI 2
 - HDMI 3
 - VGA 1
 - VGA 2
 - Composite
 - S-Video
 - DVI
 - Component
 - HDBaseT
 - USB 1
 - USB 2
 - USB C
 - USB Display
 - LAN Display
 - Smart System
- Commands
 - Set Blank
 - Set Lamp Mode
 - Set 3D Sync
 - Set Aspect Ratio
 - Set Color Temperature
 - Set Color Mode
 - Set ISF
 - Set HDR
 - Set Freeze
 - Set Brilliant Color
 - Set HDR Picture Mode
 - Set Audio Mode

Configuration

1) Add the driver to the desired room

- 2) Select the **Connections** tab
- 3) Bind the serial port
- 4) Bind the appropriate AV inputs and outputs for the projector

5) Select System Design

6) Turn on the projector either with the proxy's command command interface (double clicking the BenQ Projector listing on the left) and time the amount of time it takes for the projector to turn on.

7) Once the projector has started and the **Power On Delay Seconds** has been reached, the driver will start updating the fields in the **Properties** tab

8) If your projector is a smart projector and you wish to utilise the onboard media player please select 'Smart System' as the Default Input.

- 9) Select File then Refresh Navigators.
- 10) Congratulations you have set up the projector

FAQ

Why is my projector not responding?

- Some projectors require a NULL modem cable. Do not use a gender-bender adapter if it requires NULL modem. You can also try, "Enable Null-Modem Serial Port" which is in the Advanced Properties of the Controler
- Some projectors also require you to enable RS232 Control. This is usually under the Advance Settings menu.

Do you support IP control

- From our tests Viewsonic's API only provides 1 way IP control. It is however compatible with PJLINK
 protocol though for bi-directional control. We have opted to recommend our <u>PJLINK driver</u> rather
 than implement Viewsonic's IP protocol. Our PJlink driver has been tested to work with Viewsonic
 projectors for bi-directional control and feedback.
- Note that IP control will not work with wifi and must be ethernet. Some projectors have two ethernet ports. One for control. You must use the control port.
- You must enable Standby LAN Control on the projector
- You may need to visit the LAN Control's webserver to set it up. It will prompt you to enter a username and password to set up. You must go through this. You can disable the username and password later if not required.

I want to buy a projector can you recommend a distributor?

• We worked closely with <u>Synergy Audio Visual</u> who are the Australian Distributor for Viewsonic Home Cinema projectors. If you are an integrator within Australia we highly recommend reaching out to Synergy Audio Visual to purchase Viewsonic projectors.

What hardware will this work on?

This driver utilises Viewsonic's universal API. It is standard across most models for serial communications (Note it does not support the Pro 9 series).

Do you offer any other cool drivers?

Control4 is a major part of our business. We develop new drivers all the time. You can see all of our drivers on our website (https://chowmain.software). Sign up to our newsletter to get notified when new drivers are released.

I want to try this driver out before buying it?

• All Chowmain drivers for Control4 come with a 90 day trial.

Licensing

• How does the trial period work?

All Chowmain drivers are free to use for a set trial period. When the trial expires the driver will cease to function until you purchase a licence and apply it to the driverCentral project.

• Where do I buy a Licence from?

This driver is developed by Chowmain software & Apps and is distributed by driverCentral, Inc <u>https://www.drivercentral.io/chowmain-ltd</u>

To purchase a driver:

- 1. On driverCentral, purchase a license and register it to your project
- 2. If the driver is not already installed in your project, download it and install it
- 3. If necessary, use the cloud driver's Action: "Check Drivers" to force the licence to download into the project

Creating a Project on Driver Central

- 1. Visit http://www.drivercentral.io
- 2. Log into your driver Central dealer account
- 3. Click Portal
- 4. Click New Project
- 5. Enter the project name

Add New Project	×
Project Name	
Castillo	
	Close Add Project

6. Click Add Project

7. Click on the project we just created

Project		Status	Created
A Castillo	R	Unassigned Project	1999-12-31 23:59:56

8. Take note of the **Project Token** as this will be used later when we install the Cloud Driver

Project Token: MAC: IP: ABCDEFG012 000FFF123456 1.2.3.456
Connection Status: Last Seen: Actions: Omline + & 11

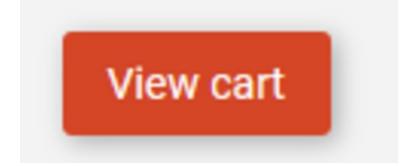

9. Click Close

Purchasing a Driver Licence

- 1. Visit <u>https://www.drivercentral.io/chowmain-ltd/</u> and find the product/driver you want to purchase a licence for
- 2. Click on Add to Cart

3. Now click the shopping cart icon (top right) and click View cart

4. Confirm that your order is correct and click on Proceed to checkout

5. Choose your payment option, provide the relevent details and click Place order

heckout	
PayPal	
Paypal Paypal, or Credit Card	Credit Card Visa, Mastercard, etc
ect this check box to accept the Terms and Conditions	
bscribe to our newsletter	
Place order (\$	400.00

6. You will now be at a page where you can see your purchased licence

License Name 🗢	License Key 🗢	Project Assigned \$	Action 🗢
1			Assign to Project

7. From here assign the licence to the project we created or if you did not follow that step create a new project

License Assignment for	×
Assign License to Existing Project	×
Select Existing Project:	
New Project (enter project name below)	•
Or	
Create a new project	
Create a new project Enter New Project Name	
Enter New Project Name	

Install the driverCentral cloud driver

- 1. Visit <u>http://www.drivercentral.io</u>
- 2. Log into your driver Central dealer account
- 3. Click Portal
- 4. Click Cloud Driver

Cloud Driver

- 5. Copy the C4Z driver to My Documents\Control4\Drivers directory
- 6. Add the driver to your project
- 7. Click on the driver to view it's properties

Cloud Status	Please enter cloud project token below	
Project Information	(1) Total, (0) Licensed, (0) Trials, (1) Expired, (0) Updates.	
Driver Version	1001	
Project Token		
	Project token from driverCentral io project portal	
Driver Actions	~	
Debug Mode	Off	

- 8. Type in the project token we took note of earlier
- 9. Click Actions tab

10.Click Check Drivers

Install Chowmain driver

- 1. Install the Chowmain driver
- 2. You will notice that the Activation Status reflects a Licence Activated state
- 3. Any driver that does not have a purchased licence will have a trial licence activated via the marketplace

Note that there is no way to reactivate the trial so please use wisely

4. If you do not then press the Check Drivers action in the driverCentral Cloud driver again

Activation Status	Update Available!!! License Activated		
Driver Version	1002		
Driver Information	Navigate to connections tab and make serial binding		
Automatic Updates	Off	~
