

AUTONOMIC

MMS-5E

Five Source Music Streamer with eAudioCast™

The MMS-5e Music Streamer is a solid-state, five-source music player complete with the features and functionality expected from the Autonomic family of products. Seamlessly integrate the MMS-5e into any of the popular automation systems, and deliver playback of pure, 24-bit/192kHz high-resolution audio, in addition to the most popular online music streaming services. Digital and analog physical outputs allow for the utmost flexibility. Paired with compatible eSeries devices, the MMS-5e supports up to five discrete streams of eAudioCast, our audio-over-Ethernet technology.

eSERIES

MMS-5e

Audiophile Quality Sound

Supports reference quality, High Resolution Audio (HRA) 24-bit/192kHz content, perfectly rendered through analog, coaxial digital and USB outputs, in addition to eAudioCast™ network streams.

Flexible Output Options

The MMS-5e supports four analog outputs through its on board HRA 24-bit/192kHz DAC, plus mirrored High Resolution PCM coax digital outputs and one output mirrored to both HDMI and USB (to DAC) formats.

eAudioCast

Our innovative, proprietary eAudioCast technology enables audio-over-Ethernet to compatible eSeries devices. The MMS-5e will support five eAudioCast streams, including all four physical streams mirrored to eAudioCast, as well as a fifth eAudioCast-only stream available when paired with Mirage eSeries amplifiers.

All Solid State

All eSeries products are completely solid state and use passive cooling systems. All moving parts have been eliminated from the entire Autonomic lineup, which translates to years of trouble free and silent performance, lower power consumption, and quick responsiveness.
