SOLO MUSIC STREAMER (FR-SOLO)

HIGH RESOLUTION MUSIC SERVER
DUAL SOURCE SOLUTION

The Ovation Solo is a true industry leader, it delivers audiophile quality sound at an extremely affordable price point. Easily controllable with a FREE iOS or Android app (Fusion Music) or working with all the major automation systems, this server can easily be the affordable, audiophile choice for all your commercial and residential integration projects.

Two sources, one RCA & one USB DAC output. Full 24 bit music support, AirPlay, multiple iTunes account support, now also featuring many different music services.

Now featuring Spotify Family, multiple Pandora (Premium) accounts, Tune-in and iHeartRadio.

COMMERCIALLY LICENSED MUSIC

The SoundMachine service offers commercially licensed music for use in any public space. This service includes messaging, management of multiple locations from one computer as well as millions of songs all licensed for use anywhere!

Also supports AirPlay for other services or music a client might want to access!

Supports Multiple iTunes Accounts

The Summit OS used on this Duet, now supports the ability to manage multiple iTunes accounts to ensure that the entire family can have their music at the ready. In addition to synchronizing the music and play lists, the Duet now backs up the music to any USB-based hard drive that is attached to it. This means that the client's no longer need to keep their computers on to listen to their iTunes collection!

Multiple iTunes Accounts
Synchronize & BackUp
