Overview

3 Day Blinds is the leading manufacturer and retailer of custom window coverings in the United States, offering outstanding service, superior value, unprecedented delivery time, and a broad range of fashionable products. With local Design Consultants we are here to help you find the perfect window treatment solution for your home!

Our design experts will guide you to the perfect product solution, handling every detail including motorization and home automation. They will help you select the best window treatments for your style and budget, measure your windows, provide a quote and arrange for installation.

The 3 Day Blinds Wi-Fi Hub enables mobile app control and doubles as a hub for integration with third party control systems like Control4 for bi-directional or uni directional control (depending on motor) with up / down / stop, position, tilt based control.

The driver comes with 5 drivers.

- Bridge Driver – Used for shade discovery and communications to one or more bridges on your network (note only one required).
- Uni Directional Shade Driver – One Way Driver. Supports Up / Down / Stop commands
- Bi Directional Shade Driver – Two Way Driver. Supports Up / Down / Stop / Level commands + feedback along with battery level.
- Bi Directional TDBU (Top Down, Bottom Up) Shade Driver – Two Way Driver. Supports Up / Down / Stop / Level commands for both top motor and bottom motors + feedback along with battery level.
- Bi Directional Tilt Shade Driver – Two Way Driver. Supports Up / Down / Stop / Level / Tilt commands + feedback along with battery level.

Version 20211214

Initial release

Driver Installation and Configuration

Information Collection

1. Install and configure your 3 Day BI phone app adding the available blinds to the rooms
2. Tap the hamburger menu button (three horizontal bars)

3. Tap your profile icon

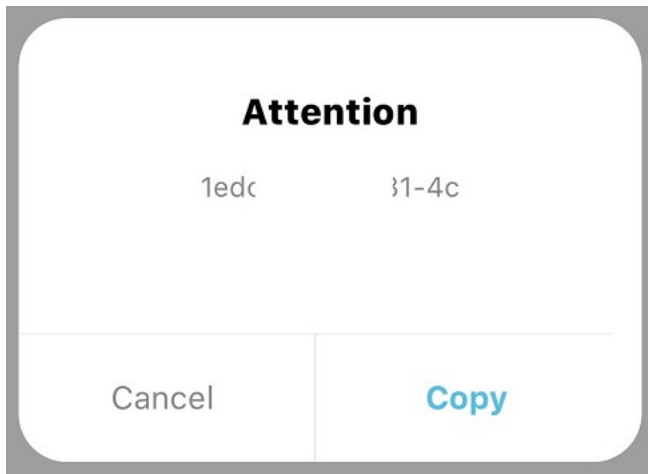

4. Tap **About**

5. Tap the logo 5 times

6. This will display a random string that you need to enter into the driver. We recommend that you copy/paste this key into an email from your phone so you can paste it in to the driver

Driver Installation

1. Open **Composer**
2. Add the **3 Day Blinds Hub** and **Blind** drivers from the zip file to your system
3. Search for the **3 Day Blinds Hub** driver from **System Design's Items Search** tab and add it to your project
4. In the **Properties** tab of the driver, paste the key into the **Secret Key** field.
5. The driver will then send out a message to all bridges on the network to discover the bridges and report back all blinds/shades connected to it.
6. Based on the bindings that appear in the Connections tab, install the appropriate driver:
 - Uni Directional Motor Driver
 - Bi Directional Motor driver
 - TDBU Motor driver
 - Tilt Motor driver
7. Now, use the blind driver to move the motor to determine which blind the driver is controlling and rename the driver accordingly. *There will be an app update in the future to allow you to see a motor's MAC address in the 3 Day Blinds app which will allow you to manually match it up.*
8. In addition you can also set up a low battery level event. The battery level is not reported in percentage and is dependent on the size of the battery. As such you'll need to adjust the Battery Level Warning percentage yourself to the level you deem as low.
9. Automatic Notifications on Low Battery Level can also be set up. This will send out an email or push notification when the battery level falls below the set level. Note 4sight is required for the email or push notification to be sent.
- 10.Refresh Navigator.

FAQ

Where can i find out more information about 3 Day Blinds products?

Learn more about 3 Day Blinds at www.3dayblinds.com or speak with an 3 Days Blind design expert.

What does this work for?

This will work for all 3 Day Blinds motorization devices connected to a 3 Day Blinds hub.

How does the 3 Day Blinds Hub communicate?

The bridge has Wi-Fi to communicate with mobile devices and internet routers. It also utilizes RF communication to send and receive messages to 3 Day Blinds motors.

Does this device provide two way control?

This driver will provide bi-directional control and feedback over blinds / curtains that have two-way feedback. If the motor is uni directional only the driver will assume the last state sent is the current state.

How does TDBU Drivers work?

TDBU drivers have two proxies associated. One for the top and one for the bottom. The top motor closes when it goes up and opens when it goes down. The bottom motor does the opposite and closes when it goes down and opens when it goes up.

Also note that if the top motor goes below the bottom motor's level it will force the bottom motor to move to the top motors desired level. This happens in reverse when the bottom motor goes above the top motor's level as well.

How does Tilt Drivers works?

The Tilt driver has two proxies associated. One for the position and one for tilt. Note that on some motors tilt is driven by a single motor and as such tilting the louver will cause the main position to shift slightly between 95-100%. This is normal behavior.

Do you offer any other cool drivers?

Control4 is a major part of our business. We develop new drivers all the time. You can see all of our drivers on our website (<http://www.chowmainsoft.com>). Sign up to our newsletter to get notified when new drivers out.

Licensing

- How does the trial period work?

All Chowmain drivers are free to use for a set trial period. When the trial expires the driver will cease to function until you purchase a licence and apply it to the driverCentral project.

- Where do I buy a Licence from?

This driver is developed by Chowmain software & Apps and is distributed by driverCentral, Inc
<https://www.drivercentral.io/chowmain-ltd>

To purchase a driver:

1) On driverCentral, purchase a license and register it to your project

1) If the driver is not already installed in your project, download it and install it

1) If necessary, use the cloud driver's Action: "Check Drivers" to force the licence to download into the project

Creating a Project on Driver Central

1. Visit <http://www.drivercentral.io>
2. Log into your driver Central dealer account
3. Click **Portal**
4. Click **New Project**
5. Enter the project name

The screenshot shows a modal dialog titled "Add New Project". Inside the dialog, there is a label "Project Name" above a text input field. The input field contains the text "Castillo". At the bottom right of the dialog, there are two buttons: a grey "Close" button and a blue "Add Project" button.

6. Click **Add Project**
7. Click on the project we just created

Project	Status	Created
 Castillo	Unassigned Project	1999-12-31 23:59:56

- Take note of the **Project Token** as this will be used later when we install the Cloud Driver

Castillo 

Project Token:

Create a new project

Enter New Project Name

Enter email for Installer Notifi

Are you sure you want to do this?

[Assign License to Project?](#)

Install the driverCentral cloud driver

1. Visit <http://www.drivercentral.io>
2. Log into your driver Central dealer account
3. Click **Portal**
4. Click **Cloud Driver**

5. Copy the C4Z driver to My Documents\Control4\Drivers directory
6. Add the driver to your project
7. Click on the driver to view it's properties

Cloud Status	Please enter cloud project token below...
Project Information	(1) Total, (0) Licensed, (0) Trials, (1) Expired, (0) Updates.
Driver Version	1001
Project Token	<input type="text"/>
	Project token from driverCentral.io project portal
Driver Actions	<input type="button" value="v"/>
Debug Mode	Off <input type="button" value="v"/>

8. Type in the project token we took note of earlier
9. Click **Actions** tab
10. Click **Check Drivers**

Install Chowmain driver

1. Install the Chowmain driver
2. You will notice that the Activation Status reflects a Licence Activated state
3. Any driver that does not have a purchased licence will have a trial licence activated via the marketplace
Note that there is no way to reactivate the trial so please use wisely
4. If you do not then press the Check Drivers action in the driverCentral Cloud driver again

Activation Status	Update Available!!! License Activated
Driver Version	1002
Driver Information	Navigate to connections tab and make serial binding
Automatic Updates	Off <input type="button" value="v"/>
